

**CASE STUDY** 

How IGNITE helped a Texas-based Oil Services company recycle broken parts and secured premium rates.

## THE ISSUES

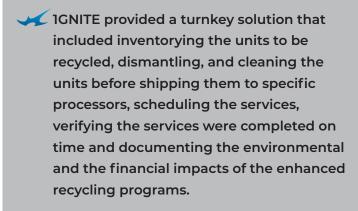

A growth-oriented, Texas-based oil field services company providing hydraulic fracturing services to leading oil and gas companies needed to reduce waste and increase both the value the flexibility of their recycling programs.

The company active fields generated a vast amount of cracked power end units as well as a variety of stainless steel parts.

Most parts were too large to be easily removed and the labor cost to prepare the units to offset the revenue from recycling them.

## THE SOLUTIONS

1GNITE negotiated premium rates by targeting manufacturers in need of feedstock and by bypassing several middlemen.

The team at IGNITE helped deliver such an easy to use solutionthat saves my group a ton of time and they secured fantastic rates too!

Regional Vice President Oil & Gas Corporation

## THE RESULTS

A turnkey solution that saved time, money and maximum recycling rates.

## THE IMPACTS

1GNITE turnkey solution created a significant revenue stream for the company.

The newly implemented solution helped the company saved months' worth of time from their full-time employees.

1GNITE's handle the current and past inventory in a matter of weeks, which allowed the customer to better use the space previously occupied by broken parts.

The company had complete visibility to the savings realized, the volume recycled, as well as the environmental impact of their new program.

Increase in return collected for the recycled material.

Visibility to the program KPI and the environmental impact of the new process

Reduction in time required to process the broken parts for recycling
